PROFESSIONAL SUMMARY

Full-stack software engineer and M.Sc. Computer Science candidate (Expected 2026) with a track record of shipping production-grade applications. Built and deployed high-performance browser extensions, client-side WebAssembly media tools, real-time CRM platforms, and interactive canvas software. Specializes in TypeScript, Next.js, React, modern backend APIs, and engineering software that is both performant and memorable.

EXPERIENCE

Freelance Full-Stack Developer

2024 – Present

Bengaluru, India

Designed and delivered a real-time CRM platform for an overseas education consultancy, centralizing the entire student lifecycle inquiry → application → loans → accommodation) into a unified Next.js + Supabase dashboard with live counselor collaboration via WebSockets and role-based access control.

Architected and shipped three public web products (Vortex, ASCII Studio Editor, Detector) with 13+ GitHub stars and active deployments serving live users.

KEY PROJECTS

Vortex — [canidownload.vercel.app](#)

<https://github.com/zeal-arch/vortex>

Next.js | TypeScript | WebAssembly | FFmpeg (Libav.js) | OPFS

High-speed YouTube media downloader where stream extraction runs server-side while audio/video multiplexing executes entirely client-side via WebAssembly FFmpeg on an OPFS sandboxed virtual disk, offloading 100% of video processing compute from the server.

Zero native binary requirements; operates friction-free and cross-platform in modern browsers.

Detector

github.com/zeal-arch/Detector

JavaScript | ChromeExtensionAPI(MV3) | HLS/M3U8 | Widevine L3

Universal browser extension supporting media detection and downloads across **170+ websites** (YouTube, Instagram, TikTok, Twitter/X, Reddit, etc.) with a generic fallback engine for unlisted domains.

Implements HLS/M3U8 adaptive streaming capture, quality selection, real-time download progress tracking, and partial Widevine L3 DRM support.

ASCII Studio Editor — [asciistudioedit.vercel.app](#)

github.com/zeal-arch/asciistudio

React | TypeScript | HTML5 Canvas API | Next.js | Tailwind CSS

Real-time creative suite converting video files, images, and live camera feeds into customizable ASCII art using high-performance client-side Canvas pixel manipulation.

Includes live shader presets (CRT Terminal, Matrix Code, Halftone Print) with granular character-set and scale controls.

CRM Platform

Private / Client Project

Next.js | Supabase | WebSockets | PostgreSQL | Zod | RBAC

Comprehensive student lifecycle system featuring automated lead scoring, multi-user real-time collaboration, and granular RBAC to streamline agency recruitment operations.

EDUCATION

M.Sc. Computer Science

Aug 2024 – July 2025

Kristu Jayanti (Deemed to be University), Bengaluru

B.C.A. (Bachelor of Computer Applications)

Aug 2020 – Apr 2023

Sharada Degree College, Mangalore

TECHNICAL SKILLS

Core Languages

JavaScript (ES2022+), TypeScript, Python, Java, SQL, C, C++

Frontend

React, Next.js, HTML5 Canvas API, WebAssembly, Tailwind CSS, Framer Motion, GSAP, Three.js, Radix UI

Backend & APIs

Node.js, REST APIs, WebSockets, Zod, SWR, Zustand, React Hook Form

Databases & Cloud

PostgreSQL, MySQL, MongoDB, Supabase, AWS S3, Microsoft Azure, Cloudflare

Developer Tools

Git, Vite, Playwright, Puppeteer, FFmpeg, Chrome Extension API (MV3), OPFS

CERTIFICATIONS

Agentic Prompt Engineering — August 2026

Microsoft Certified: Azure Fundamentals (AZ-900) — February 2025

MICE (Manipal Institute of Computer Science) — C & C++ — November 2019
